

Instructions for Baiting and checking Traps on Kaipupu July 2021

Please note any checklist discrepancies.
Do not 'tick' if the trap does not exist.
Add notes regarding track conditions, monitoring issues, signs of other pests etc, or call us while on the track so we can help solve any problems before you leave.

Only enter the following symbols in each box

Code:

M – Mouse

R – Rat (Please take photo to determine the Sex)

S – Stoat (Please collect in Plastic bag so we can determine the Sex)

T – Triggered (trap has been set off but is empty).

- Spray paint newly caught rats under Good Nature resetting traps
- Any easily identified signs of bad pests, such as, Rat, Possum or Stoat etc, should be notified to:
Hazel 027 898 2517,

All other comments should be added at the base of the checklist.

Take with you...

- Cell phone for emergency contact
- Lure:
 - Peanut Butter
 - Erayz (Stoat lure)
- Trap sheet
- Map of tracks
- Marker pen
- Ball point pen
- Toothbrush/Paint brush
- Spray paint
- Safety clip for DOC 200's
- DOC resetting tool
- Spare mouse traps to replace damaged ones.
- Screwdriver for Me & Mw line

Types of Traps:

- **DOC 200's**
(Bait with Peanut Butter)
Put Peanut Butter in teaspoon)
- **DOC Run Throughs**
(do not bait unless it has STOAT written by it)
When baiting put Erayz on **wooden ramp** leading to trigger plate.
- **A24 Goodnature resetting traps**
Not if you see anything below these traps
- **T Rex trap**
Bait with Peanut Butter
- **Mousetraps**
Bait with Peanut Butter
- Traps that sat **STOAT** get baited with Erayz lure
This is found in the 'bait' bucket under the bench.

Finding the tracks around Kaipupu

- **M** - is the main track running around the peninsular. (Numbering starts at the pest team shed). Please note **Mw** is portion of M track to the western side of Kaipupu up to and including station Mw1140. **Me** is the portion of M track on the eastern side of Kaipupu starting at Me0000. (Grade 1)
- **A** - is the first track leading off M after leaving the shed and taking a clockwise route. It is not long past where the M moves away from the fence. Numbering starts from the bottom (Grade 3)
- **B** – is an offshoot from A and meets M just before the Jetty. Numbering starts from the bottom. (Grade 3)
- **C** – is accessed by turning off at the northern outlook, opposite the start of G track, using the W track to get down to its start at a T junction where W goes left. Turn right to start C. Numbering starts with C0000, at the northern end. C track finishes at the pest team shed. (Grade 3)
- **D** – comes off M track just as M turns from a north-east to a south-east direction. Numbering starts at the bottom. (Grade 2)
- **E** – turns off at Me and meets up with G. Numbering starts at the bottom. (Grade 3)
- **F** – is the first track leading off M track if you take an anti-clockwise route. There is a rope to assist with the steep piece near the start of the track. F turns into G at the top of the hill. Numbering starts at the bottom. (Grade 3)
- **G** – is an easy track turning off at northern outlook where there is seat. G turns into F at the top. Numbering starts at the bottom. (Grade 2)
- **I** – is a short track which starts off at Me. Numbering starts at the bottom. (Grade 3)
- **Q** – Is a circular contour track accessed from track A, 50m above Mw. Please note **Qw** is the portion of Q track to the western side (portside) of Kaipupu. **Qe** is the portion of Q track on the eastern side (Picton side) of Kaipupu. (Grade 3)
- **R** – is a circular contour track 50m above Q. Accessed from track A. (Grade 3)
- **S** - Is a 400m long contour track, between tracks C/W and the main track. Accessed from track W at the northern outlook area. **SW** is reached first when going downhill from the outlook area and is a dead-end track 200m long. **SE** entrance is 30m lower down, is also a dead-end track 200m long. Please note **SW** is the portion of S track to the western side (portside) of Kaipupu. **SE** is the portion of S track on the eastern side (Picton side) of Kaipupu. (Grade 4)
- **T** – Is a 200m long contour track situated between the Main track and QE. It is accessed from E track and can be exited halfway up I. E track divides T about 1/3 of the way along with traps in a north direction and south direction. (Grade 4)
- **W** – is the western coastal track, starting from the fence roughly halfway between M and the sea with W0000. It comes out past the shed at the jetty, up the jetty track and back into the vegetation a few metres above the toilet. At the start of C track, W turns right until it meets M opposite the northern outlook. Numbering starts at the fence end. (Grade 3)

If you are incapacitated or need medical assistance ring 111 then the numbers below if you are lost or need help call
Hazel 027 898 2517 or Gerald 027 5735925
Kaipupu GPS Location
NZTM 168.4264E 543.0308N

TRACK A

To get to **A**: Walk up from the shed and left onto the **M** track. As you leave the predator proof fence **A** will be on your right leading up to the summit. Numbering starts at the bottom. (Grade 3)

Trap Types:

- 2 DOC 200's (Bait with Peanut Butter)
- 2 DOC Run Throughs (do not bait)
- 1 A24 Goodnature resetting traps (note if there is a pest below the trap)
- 14 Mousetraps (Bait with Peanut Butter)

Code:

M – Mouse

R – Rat

S – Stoat

T – Triggered (trap has been set off but is empty).

- ✓ for clear DOC trap or wax tag.
X for set off trap or marked wax tag. ID tooth mark if known i.e. rat, mouse, possum
- A 24 Resetting Trap: note if there is a pest below the trap.

Do not reset doc trap unless you are sure you are able to re set it.

If you are lost or need help call

Hazel 027 898 2517 or Gerald 027 5735925
